

PDA Polyurea Applicator Spray Course

August 17-20, 2010 • Santa Fe Springs, CA

The Polyurea Development Association Applicator Spray Course will be held in Santa Fe Springs, California at Diamond Liners Facility on **August 17-20, 2010**. This course is the most renowned course for the successful operation and setup of polyurea spray equipment!

*"It is **the** best applicator training class that I have attended in the thirty years I've been in the restoration business," said former spray course attendee, Pat Lauro, Lesco Restorations, Inc., of Spartanburg, S.C.*

COURSE INSTRUCTOR: Benjy Abbott, *Abbott Consulting & Coatings Inspections*

REGISTRATION FEES: PDA Member - \$1399; Non-Member - \$1599

REGISTER NOW: Visit www.pda-online.org and click "PDA Polyurea Applicator Spray Course" under Upcoming Events on the home page!

DRESS CODE: For your safety, please wear long pants and long sleeve shirts and closed toe shoes on days when spraying polyurea. It is suggested to wear clothing that can be ruined.

HOTEL: Radisson Hotel Whittier • 7320 Greenleaf Avenue • Whittier, CA 90602 • Phone: 1-562-945-8511

*** FREE SHUTTLE TO AND FROM DIAMOND LINERS FACILITY!**

* Just a 5 minute drive (2.07 miles) to the Spray Course facility - Diamond Liners!

For information on the Radisson Hotel, visit their website at www.radisson.com/whittierca

****VERY IMPORTANT – When making your reservation please call 1-562-945-8511 and reference the group name, "PDA Room Block" for our negotiated rate of \$85 per night.**

COURSE STRUCTURE:

- The course duration is four full days
- Runs from 8:00 a.m. to 5:30 p.m.
- Includes light breakfasts every morning and lunches every afternoon.
- We limit the class to 25 people so everyone may operate the equipment and participate in the open discussions.
- You learn from the instructors and from each other.

This course identifies the many elements involved in the successful set up and operation of polyurea spray equipment and developed as a hands-on course covering all phases of hot spray polyurea application. It also gives attendees an in-depth analysis of commercially available equipment designs and necessary hardware components to ensure successful operation and spray application of polyureas.
